

Peering Coordinators Panel

Moderated by : Serge Radovcic from Euro-IX

28th November 2007 Barcelona

The panelists

- Nigel Titley - Easynet
- Nina Hjorth Bargisen - TDC
- Christian Kaufmann - TeliaSonera
- Daniel Lowe - UK Solutions
- Victor Belov - COMSTAR direct
- Lucas van Schouwen - Highwinds
- James Blessing - Entanet

The 3 main topics from registration

- Public vs. Private Peering
- Paid Peering
- Strategies to expand peering coverage

Public vs. Private Peering

1. What is your strategy ?
2. How does it relate to the peering set-up?
3. What do you do when a peer tries to force you to go public/private?
4. Are there regional differences?

Paid Peering

1. We know its out there, can you talk about it?
2. Do you have paid / paying peers?
3. On what grounds would you pay for peering /
On what grounds would you offer paid peering?
4. When would you consider doing paid peering
instead of transit ?
5. Does it help you to improve quality?
6. Is there an increase in paid peering?

Strategies to expand Peering coverage

1. How do you decide where to go ?
2. How do you define the peering set-up (router-type, port-speed etc)
3. What tools do you use?
4. What defines the business case
 - purely economical
 - purely technical
 - or also commercial?

The other topics

- The use of route-servers
- Routing table issues (de-aggregation, long prefixes, route filtering)
- Pre-sets in peering policies (ratio's, volume etc)
- VoIP/SIP peering
- Multicast peering
- Power of regional T1 providers
- Oversubscription / port saturation on public peering fabrics
- 4 byte ASNs (is your network ready?)
