

# NETNOD - IXP UPDATE EPF11

WORKING AT THE CORE OF THE  
INTERNET

IXP | DNS anycast | i.root-servers.net

## Who is LM Jogbäck Netnods new CEO?

- **Significant experience in the Swedish Internet industry as well as broad international experience.**
- **Comes to Netnod from Google and a role as responsible for their corporate network in EMEA, India and China.**
- **Prior to Google long experience with Internet service providers in Sweden such as Tele2 and Telekom Finland/Sonera.**

## What we do:

- Operates IXPs in Sweden and Denmark
- Manages i.root-servers.net, one of the 13 logical Internet DNS root name servers in the world
- DNS anycast services to TLDs world-wide
- DNS anycast services to the Swedish enterprise market
- NTP - National time servers (Sweden)
- Working for the good of Internet

# Since EPF10 in Madrid we have:

- Added 70 new ports to our IX's
- Added 6 new staff members
- Added 4 new partners for remote-peering
- Lowered our pricing for 10GE ports and remote-peering
- Launched our DNS Anycast service for primary the Swedish enterprise market
- Secured the national time in Sweden
